

# YEVHENII PRIADKO

## Junior FullStack Developer

Email: yevheniipriadko.111@gmail.com
Phone: +380688631744
Location: Kyiv, Ukraine
LinkedIn: linkedin.com/in/yevhenii-priadko
GitHub: github.com/yevhenii-priadko
Telegram: t.me/Evgeniy_02084
Portfolio: yevhenii-priadko.vercel.app

## SUMMARY

Junior Fullstack Developer with a backend focus: REST APIs on Node.js, Express and MongoDB (JWT sessions, file uploads, validation, Swagger docs), plus React, Next.js and TypeScript on the frontend. 1+ year of hands-on development: Fullstack program at GoIT and two commercial websites delivered for real clients. Team Lead of the 13-person GoIT final project (Harmoniq). A long background in live TV broadcast sound engineering brings stress resistance and strong troubleshooting skills.

## HARD SKILLS

**Languages** — JavaScript (ES6+), TypeScript

**Backend** — Node.js, Express, MongoDB, Mongoose, JWT, REST API, Swagger, Multer, Cloudinary, Nodemailer, Joi

**Frontend** — React, Next.js, Astro, Zustand, TanStack Query, Formik/Yup, HTML5, CSS3, SASS, BEM, Handlebars

**Web** — i18n, mobile-first responsive layout, Lighthouse performance, technical SEO

**Tools** — Git, GitHub, Vite, Webpack, Axios, Vercel, GitHub Pages, Render

## SOFT SKILLS

Leadership • Crisis Management • Problem-solving • Teamwork • Client Communication • Adaptability to Agile environments

## LANGUAGES

**English** — Intermediate
**Ukrainian** — Native
**Russian** — Native

## EDUCATION

**Fullstack Developer Program**
IT School GoIT, Kyiv
*10/2025 – 08/2026*

**Bachelor in Music Arts**
Kyiv National University of Culture and Arts
*2009 – 2013*

## WORK EXPERIENCE

### Flow Atelier — Business Process Automation Agency Website

*Role: Freelance Web Developer · 2026*

Live: flow-atelier.studio

- Built a bilingual (EN/UA) marketing website for an n8n / Make / Zapier automation agency from the client's SOW and approved mockup.
- Developed 10+ content sections (services, process examples, tool comparison, FAQ) as reusable Astro components with typed i18n dictionaries, plus an animated hero diagram of data flowing between business apps.
- Implemented a lead-capture form (Web3Forms) delivering leads to the company domain email, ready to switch to an n8n webhook.
- Optimized fonts, CSS and images for Lighthouse performance; deployed on Vercel with a custom domain.
- **Tech Stack:** Astro, TypeScript, HTML5, CSS3, i18n, Web3Forms, Vercel.

### Railway Atelier — Railway Model Workshop Portfolio

*Role: Freelance Fullstack Developer · 2026*

Live: railway-atelier.studio | Code: github.com/yevhenii-priadko/railway-atelier

- Delivered a portfolio website for a workshop that converts model locomotives to brushless motors, working directly with the client from requirements to launch. Next.js 16 (App Router, TypeScript), UA / EN / DE i18n.
- Built a password-protected admin panel (Server Actions, signed httpOnly session cookie) to create, edit, reorder and delete case studies without touching code.
- Stored works in MongoDB (Mongoose) and uploaded photos in GridFS, served through an API route and optimized with next/image.
- Raised mobile PageSpeed from 71 to 92: self-hosted fonts via next/font, deferred analytics, next/image migration.
- **Tech Stack:** Next.js, TypeScript, MongoDB, Mongoose, GridFS, Server Actions, i18n, Render.

## TEAM & PET PROJECTS

### Harmoniq — Article Platform (GoIT final project)

*Role: Team Lead / Fullstack Developer · 2026*

Live: front-harmoniq.vercel.app | Frontend: github.com/yevhenii-priadko/front-harmoniq | Backend: github.com/yevhenii-priadko/backend-harmoniq

- Led a team of 13 developers: architecture decisions, code review, frontend-backend integration and task tracking on a GitHub Project board.
- Backend REST API on Express 5 and MongoDB: access/refresh JWT sessions in httpOnly cookies, avatar and article photo upload to Cloudinary, celebrate/Joi validation, Swagger docs.
- Frontend on Next.js 16 (App Router), React 19 and TypeScript: paginated article feed, article create/edit with photo upload, saved articles, author pages and a profile with parallel routes.
- Built a Route Handlers proxy layer: the browser talks to the backend only via /api/*, keeping the backend URL and credentials hidden, while Server Components call the API directly.
- **Tech Stack:** Next.js, React, TypeScript, Zustand, TanStack Query, Formik + Yup, Axios, Node.js, Express, MongoDB, Mongoose, JWT, Cloudinary, Swagger, Vercel, Render.

### Meblerija

*Role: Team Lead / Developer*

Live: yevhenii-priadko.github.io/it-creators-project-meblerija | Code: github.com/yevhenii-priadko/it-creators-project-meblerija

- Built a modern furniture store catalog designed for a smooth user experience.
- Led a team of 10 developers, managing the development timeline and resolving Git conflicts; coordinated with the scrum master to meet project deliverables.
- **Tech Stack:** HTML5, CSS3, JavaScript, SASS.

## PREVIOUS EXPERIENCE

### TV Channel "FREEDOM" — Sound Engineer

*2023 – 2026*

- Provided live location sound recording across dozens of broadcasts in high-pressure environments, maintaining consistent audio synchronization.

### TV Channel "Ukraine" — Live Sound Engineer

*2021 – 2022*

- Delivered live sound mixing and technical support across two years of on-air programming, with no reported broadcast failures.
